First, please see my review of 3D Theater: Wild Animals. All I wrote there applies to this book as well. But beyond that is the fact that the loss of so much rainforest has brought the planet nearer and nearer to a major ecological crisis. This book is therefore also a way to introduce children to just what the rainforest is, why it's so precious to every plant and every animal on Earth, including us humans, and why we must do all we can to preserve what remains. "Theater" is a good term for these books, because the scenes are so richly done that they DO have life, DO seem to move, DO have character and meaning. This is indeed a Treasure.

I got this book for my grandson. He patiently waited for it for about one year. He loves to read and study about the rainforest. The popup pages were really very detailed. We have looked at the book together and he read it to me. That in itself is priceless. the only thing I didn't like was the fact that I took so long to get this for him. I really think children in grade school would enjoy this book also.

Makes learning fun! My little one has memorized the book in less than a week due to the layout and excellent photos/drawings.

I had a great experience with ordering a book for my son. It was reasonably priced and got here a day early. The book was flawless and we had such a great time reading it. I would definitely order from them again. Keep up the great work.

Beautiful colors of the rainforest. It is also accurate, meaning that all the animals do belong to that particular habitat. For example, there are no African animals in South America.

A beautiful piece of work! The book is very detailed with each page! Tells a story about the rainforest and its habitat and beautiful wildlife! This is a keeper!

It was a great pop-up book for kids and the adult reader. Color was fantastic - it really held one's focus.
