A Tree Is A Plant (Let's-Read-and-Find-Out Science 1)

Synopsis

Did you know that a tree is the biggest plant that grows? How does a tree get the food it needs? What happens to trees in the winter? Read and find out about an apple tree's life cycle through every season. Now rebranded with a new cover look, this Common Core exemplar book features content-rich vocabulary in a classic text by Clyde Robert Bulla, beautifully detailed illustrations updated by Stacey Schuett, and a find out more section with simple experiments to learn about evaporation and tree rings, and more books to read. Both text and artwork were vetted for accuracy by an expert. This is a Level 1 Let's-Read-and-Find-Out, which means the book explores introductory concepts perfect for children in the primary grades and supports the Common Core Learning Standards, Next Generation Science Standards, and the Science, Technology, Engineering, and Math (STEM) standards. Let's-Read-and-Find-Out is the winner of the American Association for the Advancement of Science/Subaru Science Books & Films Prize for Outstanding Science Series.

Age Range: 4 - 8 years

Grade Level: Preschool - 3

Customer Reviews

This book told us that trees are all different shapes and sizes, and seeds are all different colors. If you don't know much about trees keep reading! There are many different kinds of trees. We loved

the book soo much! There are four stages in a seed life cycle: seed gets covered, seed germinates under ground, plant sprouts, grows into a big tree. All the information in the book was true, and you should read all over again!

We used to check this one out from the library, but it's so good we now own it. All of my children enjoy it, from 9 on down to the little toddler. The illustrations are pretty. There is so much information packed in here without being preachy. My 4 year old especially requests this one to be read aloud. This is a great book to have for a unit study, or just for your own little one's library.

I liked this book because it told elemets of trees and how they change every season. I would recomend this book for children that like to learn about trees and its also for kids that like to read nonfiction.

I would recommend this book because I think it would teach kids something new and they could enjoy the good illistrations.I like this book because it tells the life of the tree in the most perfect way.

I like this book because you can lear about an apple tree,and all kinds of trees. this book can teach you about trees.I like apples alot. I can recommend this book to a friend.

I like this book because i like trees my faorite part was fall and i learned that tree come from seeds i woud recommend this book because you can learn new things.

I would recommend this book because you can learn something.I learned that there are lemon trees.` this book is not comfusing because it has easy words.

My favorite part of the book is the root. I lerned that if the tree did have root it would die. I would recommend this book because it is a good book.
