Customer Reviews

My kindergarten age son loves science. He enjoys the Rookie Read About series and asked that I give this book a 0/5 star rating. He read it in under 2 minutes & said that he didn't learn a thing. I was expecting an elementary age level answer to the title question. I will summarize the book for you: electricity is a kind of energy made in power plants and brought to your home by a wire.

My 3 year old loves this book and we often read it before bed

This is a good little book for youth to help understand electricity.
