Windows 10 Introduction

Getting Started

Throughout this guide, when we use [Ctrl]+[Alt]+[Del] you can use the touch equivalent of [Tap], [Press and hold], and [swipe/drag]. [Press and hold] indicates that you can use the indicated key without using [Ctrl]+[Shift]. [Swipe] is indicated with [Slide] when in tablet mode.

Starting Windows

1. [Click] or [Touch] the starting screen.
2. If necessary, [Click] [SIGN-IN] or [PIN] and select an available sign-in method.
 - [Click] [PIN] to use Windows Hello (available in the right order).
 - [Click] [PASSWORD] to use a password (available in the right order).
 - [Click] [PIN] to use a PIN (available in the right order).
3. If you update hardware, installed additional options, or data is syncing your fingerprint, face, or iris. For password or PIN sign-in, [Click] [TO] temporarily use alternative sign-in.
4. Check settings, account, and Windows Hello device by using the center sign-in. See [Using the Settings App](#) to configure the behavior.

Ending Windows

End a computing session by building your screen, signing out, or shutting the device down.

- To lock your screen, [Click] [START] then choose [LOCK], [SLEEP], or [SHUT DOWN].
- To search your screen, [Click] [START] or [SEARCH] on the screen, or the your password then a new window.
- To sign out, [Click] [START] then choose [SIGN OUT].
- To sleep, shut down, or restart your device, [Click] [START] then select an option.

Accessing Apps and Content (Start Menu)

The Start menu is available in three ways: from the left and a pane of app tiles on the right. The left side bar includes:

- Change Account Settings, lock your device, Sign Out, or switch to another user.
- Shut Down, Restart, or put your device to Sleep.
- A list of all installed apps. From the menu, you find an app with Search (see [Searching for Apps](#)).

Power user key [Right Click] the Start menu button or press [Win]+X to access computer settings and apps.

Configuring the Start Menu

1. [Click] [START] SETTINGS, PERSONALIZATION, START.
2. Turn on/off the Start menu and Recently-added apps (if).
3. Turn on/off the ability to display Jump Lists (from the Start menu, Common tasks) for general apps on both the Start menu and on the Taskbar.
4. [Click] [CHOOSE WHICH PROGRAMS APPEAR ON START] to add or remove general tiles (see [File Explorer Settings](#)).

Change the Start menu content:

[Click] [START] SETTINGS, PERSONALIZATION, ACTION CENTER.

Resizing the Start Menu

1. [Click] [START] settings, Personalization, Action Center. The mouse pointer changes to a double-headed arrow.
2. [Drag] the edge.

Power user key: Make the Start menu of the Start menu display full screen. [Click] [START] SETTINGS, PERSONALIZATION, START. Not for use on UWP START FULL SCREEN.

Pinning an App to Start

1. [Right Click] any app on the Desktop Taskbar or within the Start menu or with File Explorer, an app or folder.
2. Select [PIN TO START].

To remove an app file or folder [Right Click] the app and select either [UNPIN FROM START] or [DON'T SHOW IN THIS LIST].

Rearranging and Resizing App Tiles

1. [Drag] a tile to a new position within the tile group or [Drag] the title bar of a tile group to rearrange the group.
2. [Right Click] a tile, choose [RESIZE], then select a size.

Managing Tile Groups

Create a new group by [Dragging] a tile below existing tile groups until a new group title bar appears.

Naming a Tile Group

1. [Click] [NAME] the tile group's title bar [Click] its right side.
2. Type a name, then press [Enter].
3. To remove a name, [Click] [X] in Step 2.

Accessing Apps and Messages (Taskbar)

Taskbar icons vary according to installed hardware:

1. System Start, Cortana/Search, Task View.
2. Pinned Apps: [App, File Explorer, Store.
3. System tray icons for apps running in the background.
4. Notifications: Battery, Wi-Fi, Sound.
5. Microsoft Edge, Action Center, Touch Keyboard, Data Sync.

Configuring the Taskbar

[Right Click] the Taskbar on a blank spot and select [SEARCH] or [SHOW TASKVIEW BUTTON] or [SHOW TOUCH KEYBOARD BUTTON] to change which buttons appear.

1. [Right Click] the Taskbar and select [PROPERTIES].
2. [Click] the [TASKBAR] button to manage the Taskbar completely. For example, NEVER COMBINE (always) opens three tiles as separate Taskbar icons. This is a good choice if you more than 18 apps and files are open at any one time.
3. [Click] [CUSTOMIZE] in the Notifications area then [SELECT] WHICH ICONS APPEAR ON THE TASKBAR to modify the number of icons.

The Taskbar behaves differently in Tablet mode (see [Working with Tablet Mode](#)). To change the taskbar, [Click] [START] SETTINGS, SYSTEM, TABLET MODE or [Click] [ACTION CENTER].

Pinning an App to the Taskbar

1. [Right Click] any app on the Desktop Taskbar or within the Start menu or with File Explorer, an app or folder.
2. Select [PIN TO TASKBAR].

To rearrange a pinned app, [Drag] it to a new Taskbar location.

Using Taskbar Jump Lists

[Swipe up] or [Right Click] a Taskbar button to display [JUMP LISTS].

Any icon (show an app), recently used files, pinned files, and sometimes related tasks on the Taskbar.

Using the Action Center

1. [Click] [Action Center] icon in the bottom right corner of the taskbar to open the Action Center.
2. Respond to each message in the Action Center. [Click] [More] to expand a card (if available).
3. [Click] [CLOSE] to dismiss all messages.
4. [Click] [CLOSE] to dismiss messages. The [Quick Actions] button grid will collapse to a single row.

Power user key: [Click] [START] SETTINGS, SYSTEM, NOTIFICATIONS & ACTIONS, QUICK ACTIONS to configure the collapsed view of the Quick Actions buttons. [Click] each button message to select an action.

Software Quick Action Buttons:

Tablet mode: see [Working in Tablet Mode](#).
Rotation lock: prevents screen rotation in Tablet mode.
Connect: Connect to wireless display and audio devices using Bluetooth, Miracast, or Wi-Fi.
Battery center: Changes system settings to reduce power consumption. Modify time settings in [START] SETTINGS, SYSTEM, BATTERY, BATTERY SETTINGS.
Wi-Fi: On/Off toggle switch. Turn on/off wireless connections (see [Settings & Troubleshooting](#)).
Quiet hours: Eliminates all messages for a set time period.

Top 10 Things You Need to Know

1. The biggest change with Windows 10 is that all your computers, tablets and smartphones look and act the same way. For this to work, you'll have to use a single app on all your devices, and you'll have to use all your devices. See [Starting Applications](#) as well as [Using the Settings App](#).
2. Get to know Tablet mode if you have a tablet or smartphone. It behaves differently than desktop mode. See [Working in Tablet Mode](#) as well as [Using the Touch Keyboard](#).
3. Windows 10 integrates the Windows 8 environment—the Desktop and Windows App. The new Start menu is the most visible indicator of this new world. See [Using the Start Menu](#) and [Using the Action Center](#).
4. Multiple monitors are becoming more common as a result of virtual desktops, multi-monitor apps, and working with Multiple Monitors. Windows 10 offers multiple desktops as a very useful alternative for single-monitor users. See [Working with Multiple Desktops](#).
5. The Edge browser is now open to the new Quick Actions pane instead of Internet. This can be adjusted if necessary. See [Managing Content with the Desktop](#).
6. Access your documents through an appropriate app. [Click] [START] SETTINGS, PERSONALIZATION, [Click] [CHANGE] [APP] on the Taskbar.
7. Searching the screen is now considerably rearranged with the introduction of Cortana. Microsoft's voice-activated virtual assistant. Cortana can be used to search not only your files but also the Web.
8. Always, setting and system control buttons are now open in a single place—the Action Center.
9. Lower power factor of screen, suspend the screen, adjust the volume, and other system settings are now available in the Action Center.
10. Check all system settings, get feedback, search for information, and get help in the new Windows 10 interface. See [Windows 10 Interface](#).

Customer Reviews

I have used cheat sheets before. However, on this one I have to use a magnifying glass.

OK, the font is way too small, but given the amount of information included in this effort, and the utility of having a one page guide to the new OS, I have to give it a pass. As a "Quick Reference Guide" it does the job, ordering just the essential information in an orderly fashion and in the sequence in which it is needed. Would it have been too much to ask to give us two pages? I think not, but I found this useful as long as I have my trusty magnifying glass by my side. The irony is that this would have been great for seniors if it were in large print. If a senior, try *Windows 10 For Seniors For Dummies*.

I expected more pages, but I guess it's four. Front and back, open for two more. There is print on front and back. I would prefer larger print and more pages. I am confused. It looks like a good quick reference if I squint at it and figure out jaegon

I found it complicated if you are a senior and new to windows 10. Sure it would be of great help for someone who only needs some assistance with Windows 10.

Difficult to follow unless you know what you are doing.

Good for beginners. I bought this for my mother. This gives the user a quick guide with simple pictures and symbols. I have used several of these items and find them very useful. This product for Windows 10 is for a beginner. An experienced user will not gain much knowledge with this item.

A concise and helpful cheat sheet for the subtle changes made in Windows 10.

Very concise but thorough ... also very handy ... a good buy
