Shipping Weight: 2.4 ounces (View shipping rates and policies)

Average Customer Review: 4.7 out of 5 stars [See all reviews](#) (12 customer reviews)

Best Sellers Rank: #202,422 in Books (See Top 100 in Books) #21 in [Books > Science & Math > Earth Sciences > Mineralogy](#) #33 in [Books > Children's Books > Education & Reference > Science Studies > Nature > Rocks & Minerals](#) #60 in [Books > Science & Math > Earth Sciences > Rocks & Minerals](#)

Customer Reviews

My son loves these quick study/class aids. I like that they are pre-punched and have a coating for them. My son likes them because they are very handy and he can usually find items he is looking for without having to flip through a text book.

Its a very helpful tool. i use this for geology 101 and the professor was pleased with it. actually he laughed at it at first then checked it out and said, "hmm thats actually not bad" so there ya go, its not bad- says a Dr!

This is a sturdy short summary of the major rocks and minerals that are most commonly studied. I like that it is plastic coated.

This tri-fold was great for geology class. Recommend to anyone studying rocks in minerals. Great information consolidated in one spot. Thanks.

This is it...Nicey protected, one page, 2 sides...FAST! Good color and easy to understand and read.Basic quick field guide.

This too is an excellent reference and quick study which arrived in perfect condition and on time. I love it!
