Customer Reviews

I used this book as part of a read aloud in my classroom. There's lots of good details with graphic features and photographs to make the book very interesting for students. I used it in a 4th/5th grade classroom. The kids were very interested in the way the information was presented. Students were able to read this book independently because it was a good reading level for this grade.

Great resource for teaching students about various non-fiction structures.

Great

Great resource for students!
