Java Gems: Jewels From Java Report (SIGS Reference Library)
The support of Java Report by the pioneers of the language has always made it the source for Java
development. From the very beginnings of Java, Java Report was there, examining each new
aspect of the language with a clear independent eye. Now, Dwight Deugo, the editor of Java Report,
has gathered the most important articles from the first year of the magazine. Written by a savvy
Who’s Who of industry experts, Java Gems covers today’s most important aspects of Java
development. Top writers and developers walk you through the topic areas that are essential to
today’s Java developers, including multitasking, design patterns, class libraries, persistence,
distributed computing, and Java vs C++.

**Book Information**
