Customer Reviews

Superb pictures and well written bits of facts that are interesting and informative without being repetitive from so many other Dino books.

My 5 year old nephew loves dinosaurs and he loved this book. It has lots of info on dinosaurs and has some great illustrations. National Geographic definitely makes a great book. Even my husband liked looking at it and learning some new facts about dinos.

I want my ESL tutee to be knowledgeable about dinosaurs as he has expressed an interest in

becoming a scientist. Although now very proficient in oral and written English, this first grader is just a sponge about reading and learning new things. His parents support my tutoring as I provide him with "Juana homework" as he helps his first grade teacher with students with need assistance. He is very nice to other students, although he does not like it that his mother has to drive his older brother to his middle school first. As a result, Diego is not always the first in line for his class. Oh, gush dern it! That is what he wants-to be first in everything. Such an ambitious and talented tutee.

My 3yo loves this he can't read but he has memorized all the dinosaurs by me reading to him...love this book.

Love this book. Dinosaurs are life like.

Great illustrations and good simple explanations.

Bought as a gift but it looked good!

Was a gift but my 5 yr old liked it.
