# Ice Age: Meet Early Humans And Amazing Animals Sharing A Frozen Planet

## Synopsis

Young readers take an exciting pictorial journey back to the time when a third of the Earth's surface was covered in ice and snow--and where the earliest human beings vied with ferocious, now-extinct animals for life's necessities. Dramatic color illustrations on every page of this absorbing book are complemented with fascinating descriptions of the predators, the scavengers, the ice age sea creatures, the Neanderthals, and the early modern humans. An illustrated time chart guides young readers through the various prehistoric eras, focusing on the Great Ice Age, which began 1.7 million years ago and ended approximately 10,000 years ago. Illustrated spreads that follow describe--

- The Neanderthal as nomad, cave dweller, and hunter
- Ice Age Mammals, including giant sloths and woolly mammoths
- Ice Age Predators, including short-faced bears and saber-toothed cats

The book's dramatic illustrations include three exciting pop-up scenes--one of them, a saber-toothed cat attacking a giant woolly mammoth. A die-cut window on the book's front cover vividly reveals a saber-toothed tiger illustrated on the title page.

## Customer Reviews

My grandkids and nephews Love this book! It has information that stirred an interest in finding out more, for the older kids, and pop-ups that stirred an interest in the younger kids! I don't know how scientifically accurate it is regarding all the species, but in terms of encouraging an interest in both the history and science and reading it is wonderful! From the small (2 year old) to the oldest (4th

grade) it was a real hit. It was such a hit with the first family I bought it for, that I bought 3 more copies for the other families!

Very simple, but still an enjoyable addition to early education of prehistoric cultures and the animals of that time which are now extinct.
